Outlook Horoscope

Aries (Mar. 22-Apr.20)

An inflexible attitude can create problems today, especially if you get into a disagreement about something that's important to you. You're confident about your point of view, but you might feel as if someone is conspiring to change your mind. Avoid escalating a passionate discussion into unnecessary conflict.

Taurus (Apr.21-May 20)

Although you reserve the prerogative to change your opinion often today, don't expect your friends to keep up with your uncharacteristic mood swings. The Moon's current visit to your pragmatic sign reassures you that your emotions make sense and no one else has the authority to tell you how to react.

Gemini (May 21-June 20)

You might not be interested in expressing your emotions today while the Moon squares talkative Mercury from your 12th House of Privacy. If you do choose to share your feelings, your words may be misconstrued as more aggressive than you intend. Wait until tomorrow when the reflective Moon enters your sign before telling everyone what you think.

Cancer (June 21-July 20)

You are at your best today when you're involved in a community project or part of a team at work. However, you might not be able to assume the identity that's necessary for you to fully merge with the rest of the group. Your current resistance to assimilation encourages non-conforming behavior, but don't be afraid of stepping into the center of the circle - even if you believe you would be more comfortable standing on the edge.

Leo (July 21-Aug. 21)

You may be asked to pitch in and help someone out now, even if you're weary of putting your needs second. But your generosity of spirit prevails because the Moon's presence in your 10th House of Public Responsibility indicates your need to assist others in reaching their potential.

Virgo (Aug. 22-Sep 22)

Your efficiency is challenged by people around you today as they make their dreams sound fascinating enough to distract you from your path. However, the determined Taurus Moon goes a long way toward keeping you on track. Nevertheless, you still need to pay attention to the boundaries of your coworkers (or the lack of them) if you want to feel good about your accomplishments by the end of the day.

Libra (Sep 23-Oct. 22)

You prefer to keep things light and easy now, but could get drawn into intense discussions about your feelings, anyhow. You might be annoyed with this emotional detour today while the sensible Taurus Moon visits your 8th House of Deep Sharing. But don't try to hide your feelings behind a friendly smile. Let others know that you are available to partake in an uncomfortable conversation as long as it's constructive, but you're not willing to feed into any negativity.

Scorpio (Oct.23-Nov.22)

You may have an encounter with a friend or a lover today that temporarily turns him or her into an opponent rather than an ally. However, it's not in your best interest to acquiesce too quickly because some things shouldn't be negotiable. Your current nemesis might appear to be quite determined, but will likely give in under your persistent pressure.

Sagittarius (Nov.23-Dec.20)

A simplistic approach to your life is a healthy antidote today to your hectic schedule. Instead of seeking the peak experiences of inspiration, you're motivated to meet your responsibilities in a timely manner because you don't like the heaviness of unfulfilled promises weighing on your mind. Although it goes against your nature, you could benefit greatly now by letting go of the big picture and concentrating on the details one item at a time.

Capricorn (Dec.21-Jan19)

You have a magical touch now and can transform the most mundane chores into fantastic opportunities for personal fulfillment. But don't let financial considerations stand in your way; it should only take a few days to resolve any stressful money issues. Luckily, you can achieve personal satisfaction even while working today because the earthy Taurus Moon assists you in a practical manner while traveling through your 5th House of Love and Creativity.

Aquarius (Jan 20-Feb.18)

You can sense a shift in the cosmic energy as beautiful Venus leaves your sign for the greener pastures of your dreams. You might feel a bit disoriented if your needs don't align with where you seem to be heading now. Unfortunately, the more you try to find your way back to the basics, the more complicated everything becomes.

Pisces (Feb.19-Mar.20)

You could become singularly focused in your quest to accomplish your goals today because you might be trying to justify taking time off later. But this strategy is ineffectual if you have already overloaded your calendar with so much to do that it will be a miracle if you can meet your own expectations. Instead of dreaming about a possible escape in the future, embrace the beauty of the present moment.
